# CAMBODIA - UNESCO World of Heritage

## **ANGKOR WAT**

Angkor is one of the most important archaeological sites in South-East-Asia. Stretching over some 400 km<sup>2</sup>, including forested area, Angkor Archaeological Park contains the magnificent remains of the different capitals of the Khmer Empire, from 9<sup>th</sup> to 15<sup>th</sup> century. They include the famous Temple of Angkor Wat and Angkor Thom, the Bayon Temple with its countless sculptural decorations. UNESCO has set up a wide-ranging program to safeguard this symbolic site and its surroundings.

## **CLIMATE**

The climate can be described as tropical (hot and humid), which is affected by monsoon. The two distinct seasons are the Rainy / Wet Season (June - October) and Dry Season. However, Dry Season is divided into two sub-seasons, cool (November - February) and hot (March - May).
