HONG KONG

Hong Kong has a subtropical climate with distinct seasons, which situated on the southeast coast of China at the mouth of the Pearl River facing the South China Sea. Covering an area of 1,104 square kilometers, the territory is made up of Hong Kong Island, Kowloon Peninsula and the New Territories. At the core is Victoria Harbour, which separates Hong Kong Island from Kowloon and beyond that, the New Territories that runs up to the boundary with Mainland China. As well as making up the bulk of Hong Kong's landmass, the New Territories also incorporates 262 outlying islands, including Lantau where the airport is located.

Season

Spring: March to May – Temperature and humidity are rising. Evening can be cool.

Summer: June to August – Hot, humid and sunny, which occasional showers and thunderstorms.

Autumn: September to November – Pleasant breezes with plenty of sunshine at comfortable temperatures.

Winter: December to February – Cool, dry and cloudy, with occasional cold fronts
